Notice of Allowability

Application No.	Applicant(s)	
10/729,515	ANANTHA ET AL.	
Examiner	Art Unit	
FATOUMATA TRAORE	2436	

-- The MALING DATE of this communication appears on the cover sheet with the correspondence addressAll claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included
herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS
NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative
of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

- 1. A This communication is responsive to amendments filed 11/26/2010 and phone interview on 12/10/2010.
- The allowed claim(s) is/are 1-16,18,19 and 21-30.
- 3. Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) All b) Some* c) None of the:
 - Certified copies of the priority documents have been received.
 - 2. Certified copies of the priority documents have been received in Application No. ____
 - Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).
 - * Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.
THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

- A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
- 5. CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
 - (a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached
 - The reto or 2) to Paper No./Mail Date _____.

 (b) including changes required by the attached Examiner's Amendment / Comment or in the Office action of

DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

Attachment(s)

- 1. Notice of References Cited (PTO-892)
- 2. Notice of Draftperson's Patent Drawing Review (PTO-948)
- 3. Information Disclosure Statements (PTO/SB/08),
- 5. Notice of Informal Patent Application
- Interview Summary (PTO-413), Paper No./Mail Date .
- Examiner's Amendment/Comment
- ê. ☑ Examiner's Statement of Fleasons for Allowance

/Fatoumata Traore/ Examiner, Art Unit 2436 1. This is in response to the communication filed 11/26/2010 and phone interview on

December, 10, 2010. Claims 1-16 and 18-32 are pending and have been considered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or

additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the

payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with

Aaron S. Reed (Reg. No. 56,116) on December 10, 20101

The application has been amended as follows:

(Currently Amended) One or more <u>non-transitory</u> computer-

readable media having computer-executable instructions embodied thereon that, when

executed, provide a system that facilitates access to a plurality of shared software objects

by disparate entities, the system comprising:

a platform component executed by a computing device having a

processor and a memory, that receives a request from a first entity to

access one of the plurality of shared software objects, wherein the first

entity is attempting to convert a subscription from a second type of a

second entity to a first type of the first entity;

Art Unit: 2436

a data store that stores security information on one or more classes of the plurality of shared software objects, wherein the security information on each of the one or more classes is inherited by one or more shared software objects in each class, and wherein the security information includes a security parameter that indicates whether the first entity is permitted to convert the subscription from the second type to the first type; and

a verification component that employs the security information to verify that the first entity has permission to call an Application Programming Interface (API) for the one of the plurality of shared software objects to convert the subscription from the second type to the first type, wherein the verification component prevents the first entity from calling the API when the security parameter indicates that the first entity is not permitted to convert the subscription from the second type to the first type and the verification allows the first entity to call the API when the security parameter indicates that the first entity is permitted to convert the subscription from the second type to the first type.

 (Currently Amended) The media of claim 1, wherein the verification component masks the object one of the plurality of shared software objects from the entity if permission does not exist.

Art Unit: 2436

18. (Currently Amended) A method to facilitate security for

subscription objects, comprising:

storing one or more security options in a database, at least a portion of the one or more security options being related to an automated billing and provisioning system, wherein at least a portion of the one or more security options includes at least conversion of a subscription from a first type associated with a first tenant to a second type associated with a second tenant, and wherein one or more of the security options indicate allowability of the second tenant to convert the subscription type from the first type to the second type;

assigning one or more of the security options to a class; [[and]] inheriting the one or more security options assigned to the class by object members of the class;

verifying that the second tenant has permission to call an Application Program Interface (API) for one or more of the object members of the class to convert the subscription type from the first type to the second type; and

preventing the second tenant from calling the API when the security options indicate that the second entity is not permitted to convert the subscription type from the first type to the second type; or

Art Unit: 2436

allowing the second tenant to call the API when the security
options indicate that the second tenant is permitted to convert the

subscription type from the first type to the second type.

(Cancelled)

21. (Currently Amended) The method of elaim 20, claim 18, further

comprising automatically authorizing the API.

30. (Currently Amended) One or more <u>non-transitory</u> computer-

readable media having computer-executable instructions embodied thereon that, when

executed, provide a system to facilitate business object security, comprising:

an authentication component executing on a computing device

having a memory and a processor that authenticates a first entity

attempting to access an online billing and service system, wherein the first

entity is attempting to convert a subscription from a second type of a

second entity to a first type of the first entity;

an authorization component that authorizes the first entity to

convert the subscription from the second type of the second entity to the

first type of the first entity upon verifying at least one security parameter,

wherein the at least one security parameter is assigned to a class of objects

and is inherited by objects of the class by one or more of explicitly and

implicitly assigning the security parameter to the objects of the class,

wherein the at least one security parameter is stored in a database and is

Art Unit: 2436

accessible via an application program interface that is automatically authorized by analyzing one or more security credentials, and wherein the at least one security parameter indicates allowability of the first entity to convert the subscription from the second type to the first type.

- (Cancelled)
- (Cancelled)

Allowance

- Claims 17, 20, 31 and 32 have been cancelled.
- Claims 1, 3, 18, 21 and 30 have been amended.
- Claims 1-16, 18-19 and 21-30 are allowed.

Examiner's Statement of Reasons for Allowance

The following is an examiner's statement of reasons for allowance

6. Zothner (US 6,751,657) is drawn toward a system and/or methodology that provide an automated and dynamically responsive infrastructure to support online subscription services. The system coordinates and manages services offered by service providers. This can include automatically creating and managing billing accounts for customers. At least one engine is provided to process multiple rules in response to subscription events that occur in connection with the services to facilitate service delivery. At least one rating processor is provided to process multiple rating rules in response to subscription events

Art Unit: 2436

7. Reunert eta al (US 7,418,426) is drawn toward An approach for providing notification services using rules-based technology is disclosed. A Business Rules Manager module maps the business rules to business triggers, in which any pre-defined action can be performed based on the rule execution. Business rule triggers map a set of object life cycle states or business processes to set(s) of business rules; these business rules are mapped to trigger conditions. Notifications are then mapped to the business triggers (i.e., notification trigger points) such that the appropriate information can be sent to the recipients according to the business conditions or business rule actions. The users subscribe to the notification trigger points based upon the users' role, as specified in the user profiles. A user supplied subscription filter criteria permits filtering of the notifications. However, a global user override attribute associated with a notification trigger point can bypass the subscription filter criteria.

- The above prior art reference of record do not teach or render obvious the limitations as recited in independent claims 1, 18 and 30 amended. The combined references fail to teach
 - a data store that stores security information on one or more classes of the plurality of shared software objects, wherein the security information on each of the one or more classes is inherited by one or more shared software objects in each class, and wherein the security information includes a security parameter that indicates whether the first entity is permitted to convert the subscription from the second type to the first type; and

a verification component that employs the security information to verify that the first entity has permission to call an Application Programming Interface (API) for the one of the plurality of shared software objects to convert the subscription from the second type to the first type, wherein the verification component prevents the first entity from calling the API when the security parameter indicates that the first entity is not permitted to convert the subscription from the second type to the first type and the verification allows the first entity to call the API when the security parameter indicates that the first entity is permitted to convert the subscription from the second type to the first type.

The combination of <u>Zothner</u> and <u>Reunert et al</u> does not render Applicants' claims obvious because the combination does not teach or suggest these features.

9. Dependent claims are allowed as they depend from an allowable independent claim.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to FATOUMATA TRAORE whose telephone number is (571)270-1685. The examiner can normally be reached on Monday- Friday (every other Friday off) EST.
